

## *Ventus Machina*

Tech Requirements:

Sound:

*Ventus Machina* performs with a very simple layout and simple lighting. We perform acoustically, using our own instruments (flute, oboe, clarinet, horn and bassoon), so usually no sound reinforcement is needed.

Stands:

We require 5 Manhasset or equivalent solid desk music stands and approximately a 10' by 10' stage area. Stands are placed in a semi-circle raised to standing height.

Lighting:

Most performance lighting pre-sets are suitable for our show. We also travel with battery-operated stand lights to be able to adjust to different venues.

Other:

Microphone for announcements: needed only if the hall is large  
If a sound shell is available, we will use it, but it is not necessary.
